

Application No.: 09/704896

Docket No.: CXT-061

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A method for incorporating a partial dynamic portion of a transmitted page into a previous version of the transmitted page displayed on a client, ~~said~~the method comprising:
 - (a) receiving, at a client, a transmitted page comprising a plurality of dynamic portions;
 - (b) displaying ~~said the~~ transmitted page on a ~~the~~ client;
 - (c) receiving, by ~~said the~~ client, a ~~regenerated modified~~ version of one of the dynamic portions of ~~said the transmitted page from a server and an identifier specifying one of the plurality of dynamic portions of the transmitted page to be replaced by the modified version of one of the dynamic portions;~~ and
 - (d) incorporating, by ~~said the~~ client, ~~said regenerated~~the modified version of one of the dynamic portions into ~~said the~~ transmitted page displayed on ~~said the~~ client responsive to the modification list.
2. (Cancelled)
3. (Currently Amended) The method of claim 2 1 further comprising receiving, by ~~said the~~ client, additional code instructing ~~said the~~ client on how to interpret commands contained in ~~said~~regarding interpretation of the modification list.
4. (Currently Amended) The method of claim 1 further comprising:
 - (e) copying a first portion of ~~said the~~ transmitted page displayed on ~~said the~~ client; and
 - (f) inserting ~~said the~~ copied first portion into a second portion of ~~said the~~ transmitted page displayed on ~~said the~~ client.
5. (Currently Amended) The method of claim 4 further comprising changing an identification tag of ~~said copied first portion inserted in said~~ associated with the second portion from a first value associated with the copied first portion to a non-identical second value associated with the second portion.
6. (Currently Amended) The method of claim 1 further comprising moving a first portion of ~~said the~~ transmitted page to a second portion.
7. (Currently Amended) The method of claim 6 wherein the step of moving further comprises saving ~~said the~~ first portion in a storage buffer.

Application No.: 09/704896

Docket No.: CXT-061

8. (Currently Amended) The method of claim 6 wherein the step of moving further comprises moving ~~said the~~ first portion of ~~said the~~ transmitted page to a second portion within said ~~regenerated the~~ modified portion.

9. (Currently Amended) The method of claim 6 further comprising changing an identification tag of ~~said~~ associated with the moved first portion from a first value associated with the first portion to a non-identical second value associated with the moved second portion.

10. (Currently Amended) The method of claim 1 wherein ~~the step (d) of incorporating further~~ comprises replacing ~~a one of the plurality of dynamic portions of said comprising the~~ transmitted page with ~~said regenerated the~~ received, modified portion.

11. (Currently Amended) A client for incorporating a ~~partial page into~~ dynamic portion of a transmitted page, ~~said client into a previous version of the transmitted page displayed on the client~~ comprising:

a transceiver, ~~said transceiver~~ receiving ~~said a~~ transmitted page and ~~any partial portions thereof~~ a plurality of dynamic portions included in the transmitted page; and

a display alterer in communication with ~~said the~~ transceiver, ~~said the~~ display alterer receiving a ~~regenerated portion of said transmitted page from a server modified version of one of the dynamic portions of the page and an identifier specifying one of the plurality of dynamic portions of the transmitted page to be replaced by the modified version of one of the dynamic portions and incorporating said the regenerated page modified version of one of the dynamic portions into said the transmitted page displayed on said the client responsive to the modification list~~.

12. (Cancelled)

13. (Currently Amended) The client of claim ~~10-11~~ wherein ~~said the~~ display alterer ~~is further configured to receive~~ additional code instructing ~~said the~~ client ~~on how to interpret commands contained in said regarding interpretation of the~~ modification list.

14. (Currently Amended) The client of claim ~~9-11~~ further comprising a storage buffer in communication with ~~said the~~ display alterer, the storage buffer storing a first portion of ~~said the~~ transmitted page displayed on ~~said the~~ client for use in updating ~~said the~~ transmitted page.

15. (Currently Amended) A system for incorporating a ~~partial page into~~ dynamic portion of a transmitted page responsive to the modification list, ~~said the~~ system comprising:

an external page code source;

a client comprising:

Application No.: 09/704896

Docket No.: CXT-061

a client transceiver, ~~said~~the client transceiver receiving ~~said a transmitted page and a plurality of dynamic portions included in the transmitted page;~~ and

a display alterer in communication with ~~said~~the client transceiver, ~~said~~the display alterer receiving a ~~regenerated portion of said transmitted page from a server modified version of one of the dynamic portions of the page and an identifier specifying one of the plurality of dynamic portions of the transmitted page to be replaced by the modified version of one of the dynamic portions and incorporating said~~the regenerated page modified version of one of the dynamic portions into ~~said~~the transmitted page displayed on ~~said~~the client responsive to the modification list; and

a server comprising:

a server transceiver in communication with ~~said~~the client, ~~said~~the server transceiver transmitting ~~said~~the page and a plurality of dynamic portions included in the transmitted page to saidthe client for display; and

a partial page regenerator in communication with ~~said~~the server transceiver and ~~said~~the external page code source, ~~said~~the partial page regenerator receiving from ~~said~~the external page code source page generation code that generates one of the plurality of dynamic portions included in the page said page and executing an associated code fragment of ~~said~~the code to ~~regenerate a portion of said transmitted page~~modify the one of the plurality of dynamic portions included in the page.

16. (Cancelled)

17. (Currently Amended) The system of claim ~~13-15~~ wherein ~~said~~the display alterer of ~~said~~the client ~~is further configured to receive~~s additional code instructing saidthe client ~~on how to interpret commands contained in~~regarding interpretation of saidthe modification list.

18. (Currently Amended) The system of claim ~~13-15~~ wherein ~~said~~the client further comprises a storage buffer in communication with ~~said~~the display alterer, the storage buffer storing a first portion of ~~said~~the transmitted page displayed on ~~said~~the client for use in updating ~~said~~the transmitted page.
